Mallarapu Devendra

+91-7396429650 | devendramallarapu8@gmail.com | LinkedIn | GitHub
Hyderabad, India

Professional Summary

Computer Science graduate focused on **Python, AI/ML, data analytics, and backend development**. Experienced in building machine learning applications, AI-powered systems, REST APIs, and interactive data applications using **Python, FastAPI, Pandas, NumPy, Scikit-learn, TensorFlow, and SQL**.

Technical Skills

Programming Languages: Python, SQL, JavaScript

Python & Backend: FastAPI, Flask, REST APIs, Pydantic, Uvicorn

Data & Analytics: Pandas, NumPy, Matplotlib, Plotly, Data Preprocessing, EDA

Machine Learning: Scikit-learn, TensorFlow/Keras, Classification, Feature Engineering, Model Evaluation

AI / GenAI: OpenAI API, Gemini API, AI Application Development

Databases: PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, Postman, Jupyter Notebook, Streamlit

Web: React.js, HTML, CSS

Experience

AICTE & EduSkills May 2024 – Aug 2024
AI/ML Virtual Intern *Remote*

- Worked on machine learning and computer vision workflows using **Python and TensorFlow**.
- Performed data preprocessing and model validation for AI/ML tasks.
- Applied Python-based machine learning techniques to develop and evaluate model workflows.

Projects

Predictive Maintenance Analytics & Prediction Platform | Python, FastAPI, Streamlit, ML

- Built a Python-based predictive maintenance application to analyze industrial sensor data and predict potential equipment failures.
- Developed data preprocessing and ML worDkflows using **Pandas, NumPy, Scikit-learn, and TensorFlow**, evaluating models with accuracy, precision, recall, and F1-score.
- Built an interactive **Streamlit dashboard** for sensor analytics, failure analysis, and model comparison.
- Implemented a **FastAPI REST API** for validated model inference and real-time failure prediction.

AI Decision Intelligence | Python, FastAPI, OpenAI API, PostgreSQL

- Developed a Python-based AI system that converts complex business questions into structured, evidence-based decision reports.
- Designed a multi-stage workflow for **question planning, research, evidence collection, analysis, and decision generation**.
- Built the backend using **FastAPI** with structured request validation and integrated data processing using Pandas and NumPy.

PlaneX AI – Planetary Feature Detector | Python, Flask, OpenCV, Gemini API

- Developed an AI-powered application using **Python, OpenCV, Flask, and Gemini API** to analyze planetary images.
- Implemented image upload and processing workflows to identify planetary objects and generate structured analysis.
- Integrated multimodal AI to extract planetary characteristics and present results through a web interface.

Education

Geethanjali College of Engineering and Technology 2022 – 2026
Bachelor of Technology in Computer Science and Engineering *CGPA: 7.72/10*
